

You can't be *too* careful

hth

WHEN IT COMES TO CARING FOR YOUR POOL & SPA ENVIRONMENT WE TAKE NO CHANCES.

It's no accident that HTH calcium hypochlorite is the world's leading pool sanitiser. For 30 years we have served the UK market with a total commitment to unrivalled quality.

Responsible Care®
Good Chemistry at Work

Our Responsible Care® Management System is your guarantee that we are doing our best for you, your pool and for the environment.

This initiative determines that every member of the Arch Chemicals team strives constantly to improve performance in the broad realms of the environment, health, safety and security.

We call it our Goal is Zero programme, which aims to eradicate all manufacturing process, transportation and environmental incidents, along with risk of injury to employees and contractors at source.

It goes without saying that this undertaking is embodied in the characteristics of our entire product range.

Choose with care, because there's zero chance, of second best when you put your trust in HTH.

With consistent product quality we sell more HTH than all cal-hypo manufacturers added together.
Call now for a FREE plant room survey.
